

Give disposable **booties the boot.**

Say goodbye to dirt and grime and say hello to YULEYS® from HexArmor, the reusable, slip-on boot cover that's helping even the dirtiest jobs clean up their act. The typical disposable booties are slippery, expensive, and after spending one day on the job, they spend a lifetime in a landfill. YULEYS can be easily slipped into and used thousands of times, while providing greater traction and protecting floors and walls.

The YULEYS Solution

Designed to help you get your work done quickly and efficiently without making a mess. Available in standard TPR and industrial-grade SEBS rubber.

- Hands-free on-and-off
- Heel-lock system
- Flexible design
- Slip-reducing tread
- Specifically designed for steel-toed boots
- Reduces effects on landfills

Clean Step System by HexArmor®

YULEYS Cost Savings

Save money by replace disposable booties with YULEYS reusable work boot covers. On average, a box of disposable booties costs \$10 for 100 pairs. If 1 worker enters a residence on average 7 times a day that would be \$.70 per day, multiply that by 5 days a week, and you've got \$3.50 per week. Multiply that with 48 working weeks a year, and your grand total is \$168/year. YULEYS are reusable, making them not only more cost effective, but also environmentally friendly.

YULEYS Are Hands-free

YULEYS hands-free design allows you to easily slip them on and off without bending over or using your hands. Once on, the patent-pending design includes a heel-lock system that keeps them firmly on your feet, and the slip-reducing tread keeps your feet firmly underneath you for a more confident step on wood, tile, linoleum and other surfaces.

Industrial Strength for Any Industry

These industrial-grade work boot covers are a perfect fit for in-home service workers, industrial workers entering sanitary work areas, food prep and agriculture, and people working in clean rooms and sterile environments. Save yourself the time of taking off your boots, or the cost and inconvenience of going through boxes of disposable booties, and take a step in the right direction.

Leaner. Cleaner. Greener.

Millions of pairs of booties are disposed of every day, which really adds up fast. YULEYS are made with industrial grade recyclable rubber and built for heavy use. And if they ever need to be replaced, they can be easily recycled and given another life. Which gives us yet another reason to feel good about wearing them.
