Cut Protection

HyFlex®

ADVANCED MECHANICAL PROTECTION

11-515

**CUT PROTECTION
WITH HIGH VISIBILITY**

High visibility with unprecedented cut resistance and durability

Experience exceptional comfort and durability combined with ANSI Level 4 cut protection and high visibility. The new HyFlex® 11-515 glove is ergonomically-designed so users are more likely to wear the glove. It helps keep workers visible in low light situations thus reducing the opportunities for hand injuries to occur.

The HyFlex 11-515 glove has several outstanding features, including exclusive Ansell Intercept Technology® yarn, which incorporate Dupont™ Kevlar® Stretch Armor Technology. The extended cuff provides additional cut protection in the highly sensitive wrist area. Our foam nitrile formulation provides longer wear for increased durability. The HyFlex 11-515 offers superior grip and tactility in light oil or dry environments, providing sure grip and assurance when handling sharp objects and knives. With incredible cut protection, high visibility and a relaxed fit, the HyFlex 11-515 enables your workers to perform safely and efficiently.

Industries

Aerospace/Transportation
Automotive
Glass Handling
Metal Fabrication
Paper Manufacturing
Plastics/Injection Molding
Public Utilities
Tier One
White/Durable Goods

Applications

Door & wood framing
Glass installation
Knife handling
Maintenance operations
Paper slitting
Sharp small part handling
Sheet metal press, small part stamping

Ansell

Performance Profile & Key Features

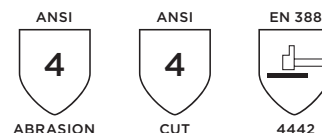

Exclusive High Visibility DuPont™ Kevlar® Stretch Armor liner

- Provides ANSI Level 4 cut protection to workers in low light settings for added protection
- Enhanced Cuff Overedging (ECO) offers more elasticity in cuff area
- ZONZ® Comfort Fit Technology creates improved fit and ergonomics by allowing tension release in the high stress areas, offering greater worker comfort

Orange foam nitrile coated palm

- Ability to handle sharp parts and knives with confidence, increasing worker output and security in light oil or dry applications
- Provides ANSI Level 4 abrasion resistance for longer life
- New coating technology provides increased wear in high stress areas
- Silicone free and made without latex for worker and product protection
- Available in a wide range of sizes to protect more workers
- Machine launderable with minimal shrinking and good recovery

The HyFlex 11-515 glove is part of the HyFlex Cut Protection range. The HyFlex glove line is comprised of four premium performance ranges: Multi-Purpose, Cut Protection, Oil-Repellent, and Special Purpose products. This new glove does not completely prevent or eliminate the potential for cuts or punctures, or abrasion related injuries and is not intended or tested to provide protection against powered blades, serrated or other sharp or rotating equipment. Users are encouraged to always use caution and care when handling sharp or abrasive materials.
