

3M Science.
Applied to Life.™

Designed for comfort. Designed for you.

When it comes to eye protection,
the right fit makes all the difference.
The SecureFit™ 300 is designed
with Asian features in mind and
self-adjusts to the individual wearer,
providing comfort that lasts all day.

3M™ SecureFit™ 300 Series

Comfort and protection in every detail.

3M™ SecureFit™ 300 Series

Many safety glass styles are designed to fit Caucasian facial features. As a result, some Asians and other ethnicities may have a more difficult time finding protective eyewear that doesn't slide off the nose or dig into cheekbones. The 3M™ SecureFit™ 300 Series of protective eyewear is designed with Asian features in mind, however, the adjusted lens angle and alternative nose bridge may help fit workers with tall cheekbone structure and low nose bridge height regardless of their ethnicity. These lightweight safety glasses also feature 3M™ Scotchgard™ Anti-Fog coating to help you see clearly and work safely.

Polycarbonate Lenses

- ▶ Absorb 99.9% of UVA and UVB rays.
- ▶ Meet the requirements of ANSI Z87.1-2015 Standard as an Impact Rated Spectacle

Soft nose pads
Designed to fit securely on a low nose bridge.

Angled for comfort
Lenses are angled to help accommodate high cheekbone structure.

Pressure Diffusion Temple (PDT) Technology
3M patented technology that helps diffuse pressure over the ear for a secure, comfortable fit.

Robust Anti-fog Coating

- ▶ Scotchgard™ Anti-Fog Coating provides fog and abrasion resistance. (Select Models)
- ▶ Resists fogging longer than traditional anti-fog coatings, up to 25 washings with water.*
- ▶ Helps provide durable scratch resistance in tough work environments.

*3M internal testing per EN168 test method when compared with traditional anti-fog coatings.

Choose your coating.
