Clutch Gear®

Impact Protection Mechanics Glove

#MXVSB

Our Clutch Gear® smart styling features molded impact protection, high-viz backs for better visibility that are flexible and do not prohibit the full range of hand movement. Dense, thermo-plastic foam rubber patches at the back of the hand to protect only in the places where impact occurs, so glove stays fully flexible.

PVC Sure Grip® palm patches offer durable grip in just the right places, with improved protection on the finger tips. A Kevlar® thumb patch extends the life of the glove in the highest wear area.

This style also features a name identifier tag to label each person's glove... you'll want to write your name on these before someone snatches them up. Protection where you need it, flexibility where you need it.

Great styling and comfort.
