

# SupplySight™

Inventory Management Program

## Streamline Your Inventory with SupplySight™

Coast-to-coast inventory optimization services.

Our inventory management system helps you maintain consistent inventory levels, gain insights on our stock levels and control account access and spending limits.

## Purchasing Management

Streamline purchasing and control costs through our custom-designed web experience that puts you in the driver's seat.

- Lower internal processing costs with increased speed and convenience.
- Easily access purchasing management system with a simple user interface.
- Set and manage approved account requisitioners, all in one place.
- Approve, edit or reject purchases.
- Set automated spend & approval levels.
- Receive in-depth reports that provide full purchasing visibility.

## Inventory Management

We've coupled technology and our team of experts to bring you top-quality inventory management solutions that let you focus on other issues while we manage your consumable inventory.

- Attend to other priorities while R.S. Hughes' experts monitor and manage your replenishment process.
- View your online order history through your R.S. Hughes web account.
- Customize on-site consumable inventory management solutions.
- Reduce the time and cost needed to determine where your inventory levels are, and where you can get more if needed.
- Optimize stocking and consumable inventory levels.
- Access a flexible reporting suite with full visibility into stock levels.

## Vend2Supply

R.S. Hughes' Vend2Supply solutions bring a secure, automated approach to your supply management with the greatest level of control, reporting, security and cost savings that we offer. Take your supply management and cost control to the next level.

- Eliminate inventory hoarding, misuse and theft with safe and secure vending solutions.
- Keep a direct line of end-user supply open and available.
- Simple and reliable touchscreen access to each machine.
- Access employee-level reporting and control with our robust reporting suite.
- Close-monitored automated replenishment process that keeps your inventory at sustainable levels at all times.
- Quickly reorder by leveraging printed QR codes on marked items.
- Find items more easily using our online Item Labels and locate them using our online search bar, your personalized Quick List, or individual product pages..

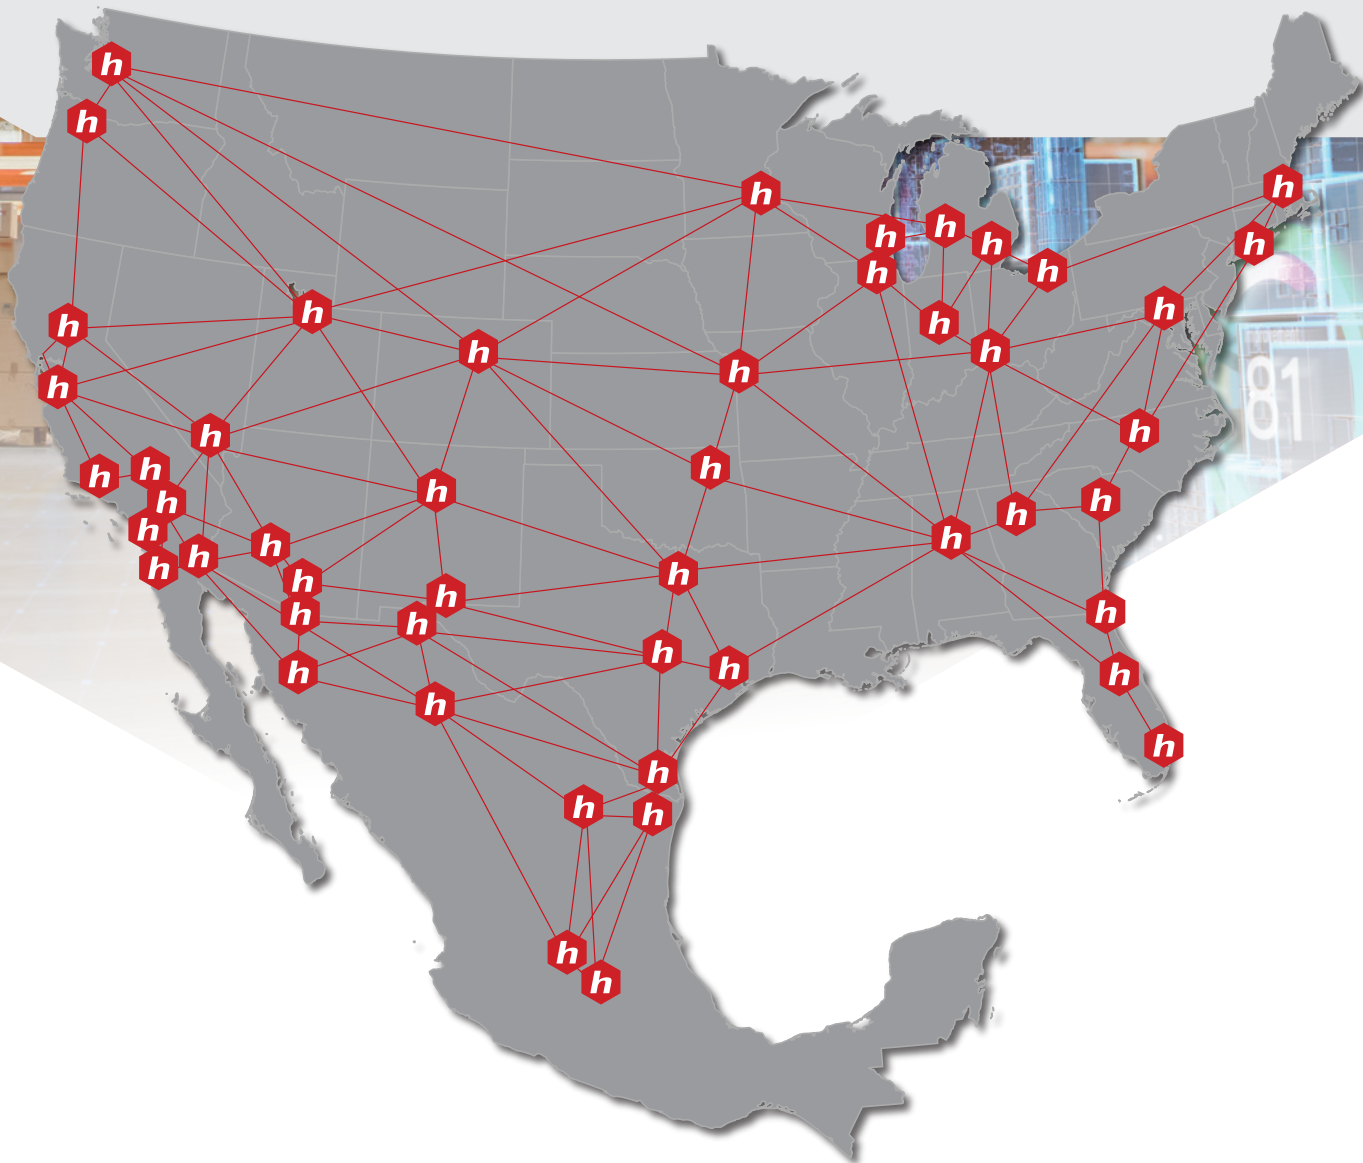

## Nationwide Local Inventory Network

We have locations across the U.S. and Mexico, each equipped with product specialists trained to help you set up an inventory plan tailored for your business. We can also store your inventory at each of our locations and quickly deliver whenever you need it, freeing up space at your facility.

# SupplySight™

Inventory Management Program

## How We Optimize Your Inventory Management

### Step One: Create Your Plan

Meet with one of our specialists for a free evaluation. Together, we'll build a custom plan for your inventory to determine what products you need at the quantities and frequencies you need them.

### Step Two: Set Up Your Quick Lists

We will then help you set up personalized Quick Lists for your inventory on our website. This will allow you to easily edit frequencies for each item in your inventory plan. R.S. Hughes account managers will also monitor your purchasing patterns and help you adjust your plan when needed.

### Step Three: Get Your Inventory

Get your inventory as you need it. Our next-day or same-day shipping options eliminate lead times, save you warehouse space and ensure you have what you need when you need it.

Set your sights on success with SupplySight™.
